

Air Quality Fellowship Manager

Project Title	Air Quality Fellowship Manager
Project Summary	Manage the global air quality fellows program, which enables US air quality experts to "adopt" a US embassy to provide policy, diplomacy and management support. You will be helping "match" fellows to post, organizing trainings, and serving as a resource for embassies and fellows.
Country	United States
Agency	Department of State
DoS Office	M/PRI
Post	N/A
Section	N/A
Number of Interns	1

Project Description

Air pollution is a serious and growing health threat worldwide, yet in many areas, real-time air quality data is not available. The Department of State has a keen interest in providing sufficient air quality information to U.S. citizens and government personnel overseas to enable informed health decisions. State and the US Environmental Protection Agency (EPA) launched a program to place air quality monitors at select embassies and consulates around the world to reduce health risks from outdoor air pollution. This program adds real-time, publicly available data in areas that currently lack it, and offers opportunities for the United States to create partnerships on air quality with other nations.
